

ValueParts VTrack Rubber Tracks

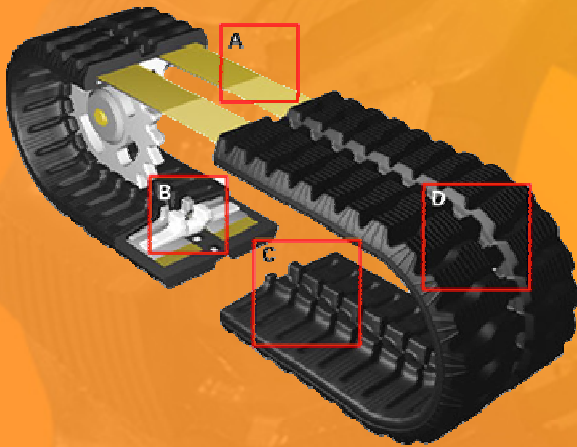

VTRACK is the perfect combination of experience and knowledge, which has been rigorously and consistently applied. The driving force behind the quality of **VTRACKS** products is an accomplished team who turns research into innovation and innovation into projects way ahead of their time.

Clients choosing **VTRACK** have the advantage to rely upon a company experienced in the international markets, with products always available and guaranteed, wherever they are requested. **VTRACK** is a world of quality where the customer counts.

To ease any worry of buying a poor quality track, all of our new rubber tracks are back by a **Manufactures Warranty** of up to **18 mo.** or **1000 hrs.** giving you a good piece of mind that we will be there for you if a problem would arise.

The VTrack Rubber Track Design - Virgin Rubber & Continuous Steel Cords

Specially designed virgin (not recycled) rubber tread compounds provides excellent resistance to premature wear, abrasion, and normal undercarriage wear and damage. Track rails and foundation components are engineered to provided the highest strength. Our rubber tracks have precision forged steel link assemblies that are laminated with strands of high tensile strength continuous steel cords. The steel cords are specially treated to provide one of the most durable rubber tracks available in the industry.

A: Continuous Steel Cords are wrapped tightly within to optimize our rubber tracks strength, enhancing your rubber tracks service life. No worries of any welds or weak points within.

B: Solid Steel Links run the width of our rubber tracks to help displace your machine load evenly across the ground, and to increase the overall strength of your rubber track.

C: Steel Guide Wings integrated within your steel links permits your sprocket and rollers to travel easily along the track without any worries of "jumping track", and roller or sprocket damage.

D: Virgin Rubber (not recycled or crumb rubber) guarantees the longest service life out of your new rubber tracks. And with dozens of track patterns available, you can rest assure your equipped with the right rubber track to operate your machine regardless of the application.

Our Superior VTrack Rubber Tracks Provide Many Benefits Including

- Lower ground pressure & minimizes ground and soil damage
- Eliminates pavement & finished surface damage
- Quieter than steel tracks
- Reduced machine vibration
- Improved traction in difficult working conditions
- Reduced weight and improved machine efficiency
- Factory tested/proven quality and performance
