Add traction and floatation to your skidsteer with the only **ALL RUBBER** over the tire attachment

Solid Construction:

- * Built with natural rubber compounds
- * Forged High grade embedded spring steel for maximum strength
- * Joints engineered for maximum longevity
- * Deep tread profile for optimal durability

Rugged / Responsive:

- * New Lifemaster tread provides aggressive traction without damaging sensitive working environments
- * Floatation even over new asphalt and concrete without scarring

Easy to use:

- * Mount and use in a matter of minutes on most skidsteer makes and models
- * Several sizes links included for proper fitment
- * Light weight and portable, for more versatility and maneuverability
